Cost-effective  
taylor-made solutions  
for fuel cells studies

MaterialsM Instruments

Since 2006 MMI has supplied laboratories worldwide with customized gas stations able to perform where standard instruments will not

Today the MM-GS series addresses a larger number of issues thanks to its compact and modular approach that fulfills any required fluid management, case by case

- ✓ Table top or self standing with fail proof test zone
- ✓ Mixing up to 5 gases
- ✓ Humidification up to 150°C
- ✓ Range 50 nmL to 5 nLt/min up to 100:1 control ratio
- ✓ 1W to 5 kW with EIS and multi-channel capability
- ✓ Advanced data acquisition
- ✓ Embedded active gas safety
- ✓ Full Software control
